

Fuel Price Checker

The Portland Fuel Price Checker is an online service, accessible on desktop or mobile device. It shows the live wholesale price of Diesel, Gasoil and Kerosene, updated every minute throughout the day.

Monitoring this data allows the user to examine trends in the live market, assisting spot purchasing. It also allows users to calculate live premiums when buying spot fuel.

We offer a one-month free trial of this service on a stand-alone basis, and it is included as a no-cost extra with any of our pricing subscriptions.

Examples of how the Fuel Price Checker looks when monitoring live diesel and kerosene prices looks are shown below:
