

# Delivered-In Pricing

Portland's delivered-in pricing sheets are emailed out daily Monday to Friday, showing average delivered-in ('bulk') prices.

These prices include transport costs and supplier margin, and can therefore be considered a 'target buying price' for delivered fuel purchases based on a full 36,000 litre delivery.

We offer both a basic email showing national averages for diesel and gasoil, and a more detailed pricing sheet showing averages broken down by region.

This data can be used to benchmark existing supply contracts and calculate fuel escalators. Examples of our national and regional services are below:

Good morning,

Portland's National Average Delivered-In Prices for 01/06/18 are as follows:

Diesel: 104.01ppl

Gasoil: 57.20ppl

All prices are exclusive of VAT and are based on full 36,000 litre loads.

Kind regards,

Portland Pricing
